Forecast for Sunday 03 Apr 2022

Weather: Dry through the early hours with some clear spells or high based clouds, and a severe chill. A dry and bright morning but cloud will start to thicken early afternoon, and rain or hill snow will quickly follow from the northwest. Hill snow later falling as rain at all elevations, heavy at times on northwest facing slopes, and widespread hill fog. Strong to gale westerly or southwesterly winds, strengthening to severe gales at elevation. These combining with hill snow to give blizzard conditions for a time.

Chance of cloud-free hill tops above 800m: Greater than 90% until midday. Lowering less than 20% chance later in the afternoon and evening.

Low Cloud and visibility: Good visibility until midday with small amounts of low cloud with bases above the summits. Moderate or poor visibility from early-afternoon due to rain and hill snow, and falling very poor in blowing snow and hill fog with widespread cloud bases 350-550 m.

Met Office Aberdeen Meteorologist's View

There will be a significant contrast in the weather from morning to afternoon, with a multitude of hazards developing.

Forecast for Monday 04 Apr 2022

Weather: Outbreaks of rain will continue through Monday, heaviest and most persistent on northwest facing slopes. Freezing levels lowering through the afternoon to allow summit snow, mainly on northeastern hills such as Lochnagar and Mount Keen. Occasional hill fog. Gale or severe gale westerly or northwesterly winds, reaching storm force on the Cairn Gorm Plateau.

Maximum wind: Westerly or northwesterly mean 40-45 mph gusting 55-65 mph.

Chance of cloud-free hill tops above 800m: Less than 10% increasing 50% by midday.

Low Cloud and visibility: Moderate or poor visibility in the morning due to rain and hill snow, and falling very poor in hill fog with widespread cloud bases 400-600 m. Cloud bases lifting to 600-800 m in the afternoon with isolated hill fog, and visibility improving to good away from rain or showers.

Temperature: **Glens:** Plus 7 Celsius rising to plus 9 Celsius falling to plus 4 Celsius.
At 800m: Plus 4 Celsius falling to zero Celsius.
Freezing level: Above summits, lowering 1000-1200 m in southwest and 700-900 m in northeast.
